Advanced Security Appliances for
Robust Network Protection

COMPREHENSIVE. INTELLIGENT. FUTURE-READY.

ABOUT US

Who We Are

Prasambi Engicon provides advanced IT solutions, including servers, networking, storage, security, power backup, biometric surveillance, and custom desktops. We ensure secure, scalable, and high-performance technology for seamless operations and future-ready businesses.

Our Vision

To be a trusted leader in IT infrastructure solutions, recognized for our innovation, reliability, and commitment to powering businesses with seamless technology. We aim to build a future where businesses operate efficiently, securely, and without limitations.

Our Mission

To empower businesses with top-tier IT solutions by delivering reliable servers, networking, security, and computing systems. Through innovation, expertise, and strategic growth, we ensure our clients have the technology they need to thrive in a rapidly evolving digital world.

OUR PROCESS

1

2

3
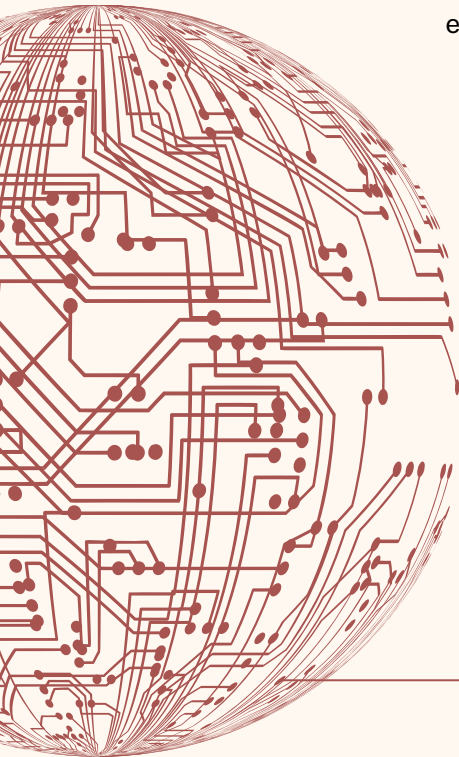

Assessment

Conduct a comprehensive evaluation of your existing network infrastructure, identifying vulnerabilities, security gaps, and potential threats. Assess compliance requirements and business needs to ensure a robust security framework.

Planning

Develop a tailored security strategy by selecting the right combination of firewalls, intrusion prevention systems (IPS), and security appliances. Ensure scalability and adaptability to evolving cyber threats while maintaining seamless business operations.

Deployment

Implement firewalls, VPNs, and other security appliances to create multiple layers of protection. Configure security policies, access controls, and encryption protocols to safeguard sensitive data from unauthorized access and cyberattacks.

OUR SECURITY APPLIANCES SOLUTIONS

Packet Filtering Firewalls

- Analyze network traffic by examining packet headers and enforce pre-defined rules to allow or block data flow.
- Ideal for basic traffic filtering and protecting against unauthorized data exchange.

Stateful Firewalls

- Monitor the state of active network connections and make dynamic decisions about traffic based on connection history.
- Provide more intelligent and context-aware filtering compared to traditional packet filtering.

Application Firewalls

- Operate at the application layer to detect and block threats targeting specific applications like web servers or databases.
- Protect against advanced attacks, such as SQL injection and cross-site scripting (XSS).

Next-Generation Firewalls (NGFW)

- Combine advanced technologies such as intrusion prevention systems (IPS), application control, and deep packet inspection for comprehensive security.
- Suitable for modern businesses requiring granular control over network traffic and robust defense mechanisms.

FEATURES & BENEFITS

01

Packet Filtering
Basic security for filtering traffic based on predefined rules.

02

Stateful Inspection
Advanced traffic analysis ensuring connection security.

03

Application-Level Security
Protects against web-based attacks like SQL injection & XSS.

04

NGFW Capabilities
AI-driven threat intelligence and deep packet inspection.

05

Scalability
Solutions that grow with your business security needs.
